

Jordan Kim

San Francisco, CA · jordan.kim@email.example · linkedin.com/in/jordankim-eng · github.com/jkim-arch

Summary

Senior software engineer with 11 years of experience designing and operating distributed systems at scale. Deep backend expertise (Python, Go, PostgreSQL) with strong ownership of reliability, observability, and cross-team technical direction. Interested in staff-level IC roles and platform engineering.

Skills

Languages: Python, Go, TypeScript, SQL, Bash

Systems: Distributed systems, event-driven architecture, PostgreSQL, Redis, Kafka, gRPC

Platform: Kubernetes, AWS (EKS, Lambda, DynamoDB), Terraform, Datadog, PagerDuty

Practices: System design, incident response, SLOs/SLIs, technical mentoring, RFC writing

Work Experience

Senior Software Engineer - Meridian Payments

San Francisco, CA · Mar 2019 - Present

- Tech lead for ledger ingestion platform processing 45M events/day with 99.97% monthly availability.
- Led migration from monolithic Python service to Go microservices; cut p99 latency from 820ms to 190ms.
- Introduced idempotent event processing and dead-letter queues; eliminated duplicate settlement bugs.
- Authored RFCs for multi-region failover; implemented read replicas and automated failover drills.
- Mentored 4 engineers (2 promoted to senior); ran weekly architecture office hours for the org.
- Owned on-call for payments core; reduced MTTR from 47 minutes to 12 minutes over 18 months.
- Partnered with security on PCI scope reduction by isolating cardholder data into a dedicated VPC segment.

Software Engineer II - Streamline Health

Remote · Aug 2015 - Feb 2019

- Built patient scheduling APIs in Python/Django serving 1.2M appointments annually.
- Designed HIPAA-compliant audit logging and role-based access for clinical staff workflows.
- Optimized slow reporting queries; added materialized views and cut nightly batch window by 3 hours.
- Led brownfield rewrite of notification service from cron jobs to SQS-backed workers.

Software Engineer - Innotech Labs

Austin, TX · Jul 2013 - Jul 2015

- Full-stack development on B2B SaaS dashboard (AngularJS, Python, MySQL).
 - Implemented SSO integration (SAML) for enterprise customers.
-

Projects

****OpenMetrics Kit**** - Lightweight SLO dashboard templates (Go, Prometheus) - 420 GitHub stars

- Talk at regional SRE meetup (2023): "SLOs without the enterprise tax."
-

Education

****B.S. Computer Science**** - University of Texas at Austin · 2013

****Certifications:**** AWS Solutions Architect - Associate (2021, renewed 2024)
